BIO Van Steenburgh Bldg Renovation

PROJECT DETAILS

LOCATION:
ATLANTIC CANADA

MARKET SECTOR:
GOVERNMENT

DELIVERY METHOD:
BID AND SPEC

The 1962 van Steenburgh building was completely renovated for the Bedford Institute of Oceanography. This storied building was to receive a new life for the Department of Fisheries and Oceans.

We provided complete mechanical services, including ventilation, heating, plumbing, and fire protection systems.

With an open concept and with modern design and materials, the centralized office facility provides the Department of Fisheries and Oceans with an up-to-date environment for their staff.
