PRINTABLE VERSION

The Canalta Centre (formerly the Medicine Hat Regional Event Centre (MHREC)) is home to the WHL Tigers. The brand-new arena is over 190,000 sqft with a seating capacity of approximately 7000, and meets all the requirements for a venue to host the Memorial Cup.

Modern Niagara is providing all plumbing, HVAC, fire protection, and HVAC controls for this project. This includes high efficiency condensing boilers, a Distech Controls System, an energy efficient design, and low-flow plumbing fixtures.

We significantly reduced the duration of rough-in by pre-fabricating all plumbing bathroom groups off site. This enabled us to meet a constrained construction schedule.

The building is targeting LEED-NC Silver certification, and was awarded the Alberta Construction Magazine People's Choice Award Winner for 2015.
