East Prince Health Facility

PROJECT DETAILS

LOCATION:
ATLANTIC CANADA

MARKET SECTOR:
HEALTHCARE

DELIVERY METHOD:
BID AND SPEC

The East Prince Health Facility is part of the integrated Health PEI network, and is the largest and most modern hospital in Western PEI.

We provided complete HVAC, plumbing, specialty piping, and medical gas services for this new construction.

Instead of a cooling tower, we implemented an engineered system in which ground-source wells are used to control the temperature of the chillers and to displace heat.
