Peel Memorial Centre for Health and Integrated Wellness

PROJECT DETAILS

LOCATION:
ONTARIO – GREATER
TORONTO

MARKET SECTOR:
HEALTHCARE

DELIVERY METHOD:
P3

Peel Memorial Centre for Health and Integrated Wellness, part of the progressive William Osler Health Care System, will provide outpatient health care services in the City of Brampton, Ontario. Specialized services will be provided through urgent care, day surgery, and speciality clinics focused on providing care to individuals with chronic conditions such as diabetes, kidney disease, mental health issues, and asthma.

We are providing full mechanical construction for the 500,000 square foot facility, including building automation systems, geothermal cooling solutions, plumbing, pneumatic tube systems, fire protection (including clean agent gas fire suppression systems), medical gas systems, and HVAC solutions.

Our approach to this project reflects its importance in the community. Careful thought and planning, as well as appropriate material selection, will ensure all systems are installed with materials that promote longevity and eliminate the need for costly repairs and replacement. Systems such as medical gas require special installation and thorough testing to ensure they meet strict public safety standards.

Targeting LEED-NC Silver certification, the new health care facility will provide state-of-the-art integrated health care delivery on an outpatient basis.

The scheduled occupancy is October 2016.
