Winchester District Memorial Hospital

PROJECT DETAILS

LOCATION:
ONTARIO – GREATER OTTAWA

MARKET SECTOR:
HEALTHCARE

DELIVERY METHOD:
BID AND SPEC

Winchester Hospital underwent a major construction and renovation that included 3 new operating rooms, renovation of an existing operating room, and demolition of an old wing.

We provided all mechanical services for these projects, working closely with the hospital and all partners to ensure that patient dialysis continued uninterrupted during construction and the transition of patients from the old wing to the new new wing.

From mechanical piping to heating, cooling, plumbing, ductwork, insulation, and building controls, we were instrumental in this expansion, which also added new patient care rooms, an isolation suite, and physiotherapy rehabilitation facilities.
