

Martensville High School

Location: Saskatchewan

Market Sector: Education

Delivery Method: Bid and Spec, Mechanical Construction

This new high school in Martensville, Saskatchewan, is a multi-purpose facility, featuring three full-size sports courts and a running track in addition to classrooms and offices.

Modern Niagara is providing all mechanical systems for this project, including heating, cooling, plumbing, ductwork, controls, sprinklers, insulation and balancing.

The project is proceeding in phases, beginning with the new school. Our project management and site safety expertise has come to bear as we stage the mechanical installations and plan construction to ensure minimal impact and risk to the students and teachers.
